

General Requirements

- Ensure all modules follow a consistent UI/UX design.
- Apply the same button styles, spacing, colors, typography, and layout throughout the system.

1. USER MANAGEMENT

1.1 Users

Bugs

- Delete button is not working.
- Save Changes button is not working.

Expected Result

- Delete should successfully remove the selected user.
- Save Changes should update user information correctly.

1.2 Departments

Task

- Remove the **Departments** page completely.

1.3 Roles & Permissions

Bugs

- Failed to create user.
- Delete button is not working.
- Save Changes button is not working.

Feature Request

- Implement a proper **Hierarchy**.

1.4 Module Structure

Move the **User Management** module inside the **Settings** module.

2. SOP MANAGEMENT

2.1 Rename Terms

Replace the following labels:

Current	Change To
Organization Management	SOP Management
Hierarchy	Dashboard

2.2 Business

Validation

- Proper validation during Create.

Edit

- Fix/Edit functionality.

Delete

- Confirmation dialog before deleting.
- Delete button should function correctly.

2.3 Departments

Bugs

- Fix issues in the Information Table.

2.4 SOP Management → Files

Basic Information

Add Business Checklist.

Example

- ☐ HR
- ☐ Finance
- ☐ IT
- ☐ Operations
- ☐ Marketing

Section

Requirements

- Replace text field with a Rich Text Editor.
- Allow file attachments.

Steps

Remove the **Steps** page.

Assignment

Requirement

- Add filtering by:
- Department
- Category

2.5 Additional Features

View Mode

Provide two display options.

- List View
- Grid View

Share & Download

Each SOP should support:

- Share
- Download
- Public Access
- Private Access

Global Search

Implement a system-wide search.

The search should find:

- SOP Name
- Department
- Category
- Assigned User
- Keywords

3. COURSE MANAGEMENT

Course Builder

UI Improvements

Improve the Course Builder interface.
